for obesity prevention and healthy life style promotion

Co-funded by the
Erasmus + Programme
of the European Union

**CORRECTIVE VET INTERNATIONAL TRAINING FOR OBESITY
PREVENTION AND HEALTHY LIFE STYLE PROMOTION -
CORRECT IT!**

2017-1-RO01-KA202-037373

01.09.2017 – 31.08.2019

STRATEGIC PARTNERSHIPS FOR VOCATIONAL EDUCATION AND TRAINING

According to the EU Action Plan on Childhood Obesity 2014-2020, the proportion of the population in EU countries who are overweight or obese remains worryingly high for adults and for children and young people, despite action at the European level to reverse the rising trend (EU Action Plan on Childhood Obesity 2014-2020,p.2). The implications of overweight and obesity in the Europe are stark: the prevalence of obesity has more than tripled in many European countries since the 1980s and with this rise comes a concomitant increase in rates of associated non-communicable disease. The WHO's Childhood Obesity Surveillance Initiative (COSI), around 1 in 3 children in the EU aged 6-9 years old were overweight or obese in 2010. This is a worrying increase on 2008, when estimates were 1 in 4.

<http://correct-it.eu>

CORRECT IT! will contribute to the eradication of this important global issue with the following outputs:

a healthy lifestyle concept analysis and collection of good practices;

a VET obesity prevention and healthy lifestyle curricula

a tested platform and VET blended learning obesity prevention and healthy lifestyle training materials;

a pool of trainers from the 5 countries;

424 trainees among the 3 target groups who will acquire knowledge, skills and tools to provide clear messages on healthy diets and nutrition, physical activity, prevention of obesity and metabolic diseases and nondiscriminatory behavior towards the obese or overweight persons.

The objective of the CORRECT IT! project is to contribute to the obesity prevention and promotion of a healthy lifestyle among target groups, patients, beneficiaries, children, teen agers, adults, public authorities, other stakeholders.

The long term expectation is to offer health professionals, teachers, social workers instruments and knowledge to address issues regarding malnutrition and discrimination, in order to prevent premature deaths and significantly reduce the burden of preventable diet-related noncommunicable diseases, obesity which are strongly influenced by lack of knowledge, awareness and care and have a profound negative impact on well-being and quality of life.

The direct target groups of the project will be nurses in schools & kindergartens, the community nurses, the nurses from primary medicine, nurse educators and other health professionals, VET teachers, social workers, psychologists, professions who have an important and educative impact on population.

OAMGMAMR Iasi Branch (Romania) - Project coordinator

The organization has more than 13,000 members – nurses, midwives and medical assistants, among which more than 8500 active members. The activity of the organization consists in the control and supervision of the of nurse and midwife professional practice. OAMGMAMR Iasi Branch organizes professional education events during which it encourages the professional exchange of experience and best practices in order to increase the professional competence of its members. The organization is also concerned about harmonization of the level of professional education and competences of nurses and midwives with the EU standards.
